

Join Us!

Sharptop Arts will be transforming the existing landscape at the art center into a Visionary Arts Garden with many creative vistas. Currently, the landscaping is very basic and not conducive to classes or events. By expanding our boundaries to include the great outdoors, we offer the community a delightful soul feeding experience of a unique and very creative garden setting where classes can be held, events can take place, or can be visited for quiet contemplation and wondrous discovery.

Come Play With Us!

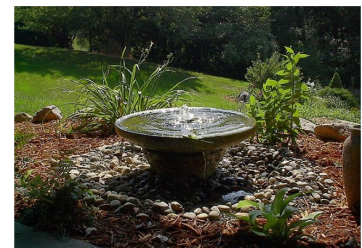

The gardens will be divided into "vistas", with each one offering a uniquely creative experience. We are offering the vistas to the public at large to design and create each one. **We ask you to adopt a vista.** The concept is just like a designer show-house, where each room or "vista" is created by a different designer/creator. Each vista will have certain parameters to be included, but other than that, we are asking the community to submit story boards with your idea for creating a vista. The story boards will be reviewed by the selection committee and will be announced February, 2010. Each creator must be willing to present a story board of their creation, facilitate, purchase, and install all materials in the vista and complete within a designated timeline. Sharptop Arts will consider any requests for reimbursement of funds to purchase major items in each vista. Approval is subject to committee vote and budget available. Once built, each creator is not responsible for maintenance. All items in each vista become property of Sharptop Arts Association upon completion. Each vista will have a prominent name plaque honoring the design team and sponsor. *A great means to get your name out into the community.* Hemlock's Landscape Management is partnering with Sharptop Arts Association to provide a complete transformation of the front gardens and will act as project coordinator in all aspects to bring cohesiveness to the gardens.

We invite you to join our efforts of transformation by either choosing to create one or more vistas, volunteer to stage vistas, or perhaps become a sponsor on some level. Vistas may be adopted by a group of participants as well as individuals. To learn more: www.sharptopartsassociation.org.

Sharptop Arts Association Visionary Gardens Project

- > Vista specs available for pick-up
December 7th to Jan 1st
- > Vista Adoption Application Due
January 2nd, 2010
